

Deployment strategy guidance

Optimize your Atlassian foundation for performance, scalability, resiliency, and productivity

There are many options when choosing a deployment path for your Atlassian solutions, and it's hard to know which path is right for your organization. You may encounter complexities in determining the optimal approach and aligning it with team processes due to diverse choices and a lack of specific expertise. When organizations undergo significant changes like acquisition and growth, there is a risk of your technology architecture becoming challenging to administer. This can lead to inefficiencies and increased costs if the solutions no longer align with your evolving needs and capacities.

With a strong focus on performance, scalability, and resilience, Atlassian Advisory Services provides specialized guidance and strategic insights to navigate deployment, installation, and migration effectively, minimizing risks and disruptions while maximizing value return. This service evaluates your architecture and infrastructure to offer deployment options that suit your needs and budget while minimizing risks. Recommendations are customized based on our extensive knowledge in configuration strategy relevant to your domain and work methods.

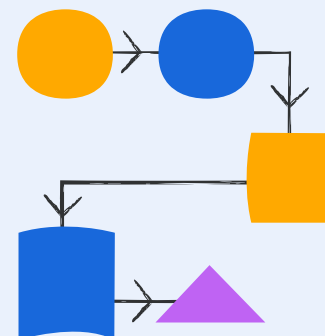

This service is designed to:

- Evaluate your existing platform landscape to understand the desired future state and assess available resources for transition
- Provide recommendations for a solution design optimized for performance, scalability, and resilience
- Prepare for a smooth deployment with best practice guidance and recommendations of the optimal approach

Overall expected outcomes

Tailored recommendations leading to:

- Confidence that your deployment and configuration strategy are optimized for your ways of working and goals
- Greater system reliability through strong performance and stability
- Improved user satisfaction with the design of the Atlassian toolchain supporting their work
- Strategies for mitigating risks within the environment

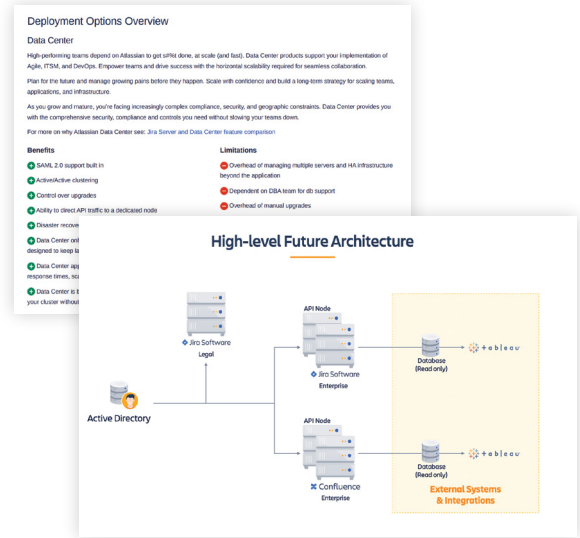

What to expect

Assessment and strategic recommendations report, including:

- Tailored solution architecture diagrams as applicable
- Guidance on optimal deployment approach with risk mitigation strategies
- Infrastructure and HA/DR options to support scalability and reliability

The service is right for your organization if you:

- Will be transitioning from a server or self-hosted installation
- Face significant organizational changes like acquisition or scaling
- Want to consolidate or split instances to improve transparency and productivity
- Need to upgrade your infrastructure to support up-time and high availability

Maximize your impact

DEPLOYMENT STRATEGY GUIDANCE

Minimize risks and disruptions while maximizing value return with tailored guidance and strategic insights that help you effectively navigate deployment

Silver Service

CONFIGURATION HEALTH CHECK & OPTIMIZATION

Achieve improvements in team productivity, efficiency, and overall performance by streamlining and optimizing your product configuration, processes, and workflows

Silver Service

ADVISORY SERVICES SUBSCRIPTION PLANS

Embrace a mindset of continuous learning and improvement with an ongoing Advisory Services subscription and get exclusive access to all the experts have to offer

Essential / Signature / Elite

Service details

Our team of Advisory Services experts will precisely carry out the following service modules.

SERVICE MODULES	ACTIVITIES	DELIVERABLES
Discovery	<p>Facilitate initial discussions with project stakeholders to:</p> <ul style="list-style-type: none"> ▪ Set clear engagement expectations ▪ Provide guidance in selecting specific focus areas, including: <ul style="list-style-type: none"> ▪ Consolidation versus federation ▪ Monitoring and performance measurements ▪ Self-hosting of Atlassian products (if applicable) ▪ Backup planning, Disaster Recovery (DR), and High Availability (HA) ▪ Gain a base understanding of current architecture and solution requirements 	<p>Established working agreements and documented alignment on execution milestones, current state architecture and infrastructure, solution use cases, and requirements</p>
Interviews and assessment	<p>Collaborate closely with your team, including architecture, network, security, administrators, and Solution Partners, to:</p> <ul style="list-style-type: none"> ▪ Evaluate your existing deployment strategy, current footprint and infrastructure, pain points, and performance concerns ▪ Define your desired future state based on use cases and requirements ▪ Assess available resources, including budget and personnel, and readiness for transition 	<p>Initial assessment and recommendations providing a clear understanding of your current deployment configuration</p> <p>Preliminary design documenting the most suitable approach tailored to your objectives</p> <p>After sharing our initial insights and recommendations, we will collaborate with you to ensure alignment on your desired future deployment strategy within the Atlassian environment</p>
Solution design	<p>Using the input from your cross-functional teams, we will:</p> <ul style="list-style-type: none"> ▪ Analyze potential implementation options, weighing advantages and concerns ▪ Review existing design documents to ensure alignment and optimization to the desired state ▪ Suggest mitigation strategies for potential risks associated with the deployment ▪ Share best practice guidelines and recommendations for a smooth deployment 	<p>A strategic deployment plan outlining your best deployment options, inclusive of critical factors surfaced by your team to help you understand the path forward through detailed solution design parameters</p>

SERVICE MODULES	ACTIVITIES	DELIVERABLES
<p>Recommendations report and strategic brief</p>	<p>Receive a report and strategic brief detailing Atlassian’s prioritized recommendations, ideal solution design, potential risks, and next steps, including but not limited to:</p> <ul style="list-style-type: none"> ▪ Architectural diagram ▪ Infrastructure suggestions ▪ HA/DR considerations ▪ Deployment options <p>Discuss these high-level findings on a strategic brief call with organization stakeholders and your Solution Partner for total alignment as you move forward to the next steps in your deployment.</p>	<p>Finalized report of prioritized recommendations to ensure you are well-prepared to implement a successful deployment strategy tailored to your specific needs</p> <p>A strategic brief presentation highlighting your highest priority next steps to align organization stakeholders and Solution Partners</p>

Our ability to collaborate and ultimately deliver the outcomes discussed above depends on certain key factors and contributions from you, as described above, without which the engagement may be delayed, prove unsuccessful, or be impossible to complete.

The services described in this datasheet will be deemed complete on the earlier of (i) Atlassian’s delivery of the service activities listed above and (ii) twelve (12) months from the start date indicated in your order for the catalog services.

As part of a signature or elite subscription plan, this service engagement is SILVER.
