

11-Oct-2022

Atlassian Pty Ltd  
Level 6/341 George Street  
Sydney, NSW, 2000  
AUSTRALIA

To Whom It May Concern,

### **Letter of Assessment**

From 23-May-2022 to 26-Aug-2022, pursuant to our agreement with Atlassian Pty Ltd, elttam conducted a review of Confluence Cloud, with a primary goal of performing an application security assessment to identify vulnerabilities, weaknesses, and recommendations.

The application security assessment used a hybrid of methodologies to evaluate the security posture of Confluence Cloud, using a black-box methodology in a staging environment to directly test the security posture of user-facing features, followed by a white-box methodology to evaluate software security fundamentals. In addition to the application security assessment, elttam conducted supporting testing activities to provide holistic testing coverage that align with [FedRAMP guidance](#) and its listed attack vectors.

Atlassian has been provided with detailed findings, including recommendations resulting from the assessment. The engagement concluded with a close-down meeting and a report was issued to Atlassian Pty Ltd.

elttam is an independent information security company providing research-driven security assessment services to leading organisations around the world. We combine pragmatism and deep technical insight to help our customers secure their most important assets.

Sincerely,

Daniel Hodson  
Director
