To Whom It May Concern,

Letter of Assessment

From 13-May-2024 to 03-Jun-2024, pursuant to our agreement with Atlassian Pty Ltd (Atlassian), elttam conducted a review of Atlassian Analytics web application.

The engagement with Atlassian was carried out by two technical consultants over the assessment period using a code-assisted web application security testing methodology. This included both manual and automated, dynamic and static analysis of the application for common web application security vulnerabilities and misconfiguration, along with some light code review of the related back-end services such as `dullboy`, `avp-export-service`, and the `plato-provisioning-service`.

The engagement concluded with a close-down meeting where findings were discussed with stakeholders. A final report, detailing technical issues and offering remediation advice, was then provided to Atlassian Pty Ltd.

elttam is an independent security company providing research-driven security assessment services to the Fortune 500, global financial institutions, leading technology companies, Australian Federal Government, and up and coming technology start-ups. We combine pragmatism and deep technical insight to help our clients secure their most important assets.

Sincerely,

Matt Jones
Director
