To Whom It May Concern,

### **Letter of Assessment**

From 1st December 2020 to 5th March 2021, pursuant to our agreement with Atlassian Pty Ltd, elttam conducted phases 1 and 2 of a review of Micros, Atlassian's Platform as a Service (PaaS).

The engagement commenced with a kick-off meeting to confirm access and project scope and a walk through of the product. The assessment was performed by one consultant over the assessment period following a white-box testing methodology. The objective was to perform security testing of high-risk core features of Micros, driven by supporting threat modelling. Each phase will continue to map out plausible threats, existing countermeasures, recommended security controls and identify targets for subsequent testing. Each phase of the engagement was wrapped up with a close-down meeting and a report was issued to Atlassian.

elttam is an independent security company providing research-driven security assessment services to the Fortune 500, global financial institutions, leading technology companies, Australian Federal Government and up and coming technology start-ups. We combine pragmatism and deep technical insight to help our customers secure their most important assets.

Sincerely,

Nina Rodgers  
Operations Manager
