To Whom It May Concern,

### Letter of Assessment

From 12th January 2021 to 26th February 2021, pursuant to our agreement with Atlassian Pty Ltd, elttam conducted a multi-phased assessment project focused on Trello Power Ups based on risks identified in an annual Trello Risk Assessment.

Each phase of the project commenced with a kick-off meeting to confirm access and project scope and a walk through of the product. The assessment was performed by a team of two consultants over the assessment period following a white-box approach combined with dynamic testing. The three phases were Threat Modelling of Trello Power Ups, a White-Box Review of Trello Power Ups and a review of the Trello CICD Pipeline. The engagements were each wrapped up with a close-down meeting, findings lodged as Jira tickets, and the output of the project and threat model documented on Confluence.

elttam is an independent security company providing research-driven security assessment services to the Fortune 500, global financial institutions, leading technology companies, Australian Federal Government and up and coming technology start-ups. We combine pragmatism and deep technical insight to help our customers secure their most important assets.

Sincerely,

Nina Rodgers  
Operations Manager
