16 December 2022

Atlassian Pty Ltd

Level 6, 341 George St

Sydney NSW 2000

AUSTRALIA

To Whom It May Concern,

The Missing Link was engaged by Atlassian to perform a source code assisted web application and API penetration test of the Statuspage Cloud application. Statuspage is an application that allows teams to keep the general public or relevant stake-holders informed of the status of applications and infrastructure.

The objectives of the engagement were to identify exploitable vulnerabilities, subvert standard workflows, gain unauthorised access to the application or user records, and attempt an underlying server compromise.

The assessment was conducted using a white-box methodology, with full access to all source code and the assistance of the Statuspage engineering team.

Testing was performed by two security consultants in a test environment between the 22nd of November and 8th of December 2022.

Sincerely,

The Missing Link Security Pty Ltd
