Jira Align Program Expansion

Accelerate outcomes through wider deployment

Effectively scale by deploying additional programs in Jira Align to gain broader visibility and improve the attainment of your organization's strategic objectives. Our Advisory Services team will build upon the foundation laid in Jumpstart to facilitate the expansion of up to three new programs, ensuring a smooth integration experience that optimizes productivity and visibility and enables your team to support further expansion.

The service is designed to:

- Create an onboarding flywheel for new programs
- Align programs with diverse operating models
- Reinforce strategic objectives and product management goal alignment
- Support team planning with explicit dependencies
- Streamline ranking for seamless strategy, investment, and team integration
- Improve program development infrastructure with extended reach and support

The Service is right for your organization if you are:

 Ready to scale and expand alignment across multiple programs

Overall expected outcomes

Tailored recommendations to:

- Efficient project prioritization and cross-functional alignment
- Increased efficiency in program planning and management
- Improved multi-program strategic alignment
- Expanded tool proficiency and competency across Jira and Jira Align
- Need additional assistance adding new and/or existing programs
- Face limited visibility and resource allocation issues across programs
- Struggle with addressing impediments and adaptability

Our Agile and Jira Align Advisory Services experts will carry out the following service modules with precision.

Service details

SERVICE MODULES	ACTIVITIES	OUTCOMES
Discovery and planning	Facilitate program discovery discussions focusing on the following aspects to inform the plan: Expectations of service Define roles and responsibilities Identify participating programs and associated teams Identify additional configurations needed to scale	Creation of a plan to ensure optimal program setup, configuration, and a successful launch. The plan will include the following: Goals Program workflows Jira Align capabilities crucial to support program team use cases Decisions needed to create additional configurations Project deliverables and timelines
Configruation, validation and implementation	 Update configurations Connect Jira projects and boards Present the workflow solution demo to validate its compatibility with program teams and their operational methods. Refine the solution workflow based on feedback. Implement solution workflow 	 Implementation of the optimal program setup and configuration that aligns with team workflows and the program's preferred ways of working to support a successful launch Improved visibility and reporting across all programs at every level Connected Jira projects and boards
User and Admin training	 Provide training materials that the trainer can tailor to each program team's needs Conduct a training session, either for the trainer or user training for a specific program Provide Admin training 	 User adoption through proper enablement of Jira Align The trainer can support new user enablement as Jira Align is expanded to additional programs Continued and successful expansion by Admins
Monitor and wrap-up	Upon deployment to teams, we will support the validation that intended workflows are appropriate to ensure adoption by: Provide "office hours" for all users to give them the ability to ask questions and provide visibility to any gaps Identify enhancement opportunities based on user feedback Provide advice and documentation to support enhancement opportunities and usage of advanced capabilities	 Users able to recognize the value in Jira Align Identification of any gaps crucial to user adoption early Enable you to create a Roadmap for enhancements and expansion

The catalog services described in this datasheet will be deemed complete on the earlier of (i) Atlassian's delivery of the service activities listed above and (ii) twelve (12) months from the start date indicated in your order for the catalog services. As part of an elite subscription plan, this service engagement is Gold.
