To Whom It May Concern,

Letter of Assessment

From 17th February 2021 to 25th February 2021, pursuant to our agreement with Atlassian Pty Ltd, elttam performed threat modeling of the Hosted Account Management Service (HAMS) API as a follow-up activity from a previous security assessment.

The engagement commenced by reviewing previous security activities across HAMS and related Commerce components. The project was performed by one consultant over the assessment period following a threat modelling methodology to map out entry-points and trust boundaries of HAMS, then identifying potential threats and countermeasures for further security hardening work. The results of the engagement were documented on an internal wiki page.

elttam is an independent security company providing research-driven security assessment services to the Fortune 500, global financial institutions, leading technology companies, Australian Federal Government and up and coming technology start-ups. We combine pragmatism and deep technical insight to help our customers secure their most important assets.

Sincerely,

Nina Rodgers
Operations Manager
