To Whom It May Concern:

In May of 2020, pursuant to our agreement with Atlassian Pty. Ltd., the Bishop Fox assessment team conducted a hybrid application assessment of the Bitbucket Cloud applications.

The assessment objective was to identify, within the designated time and scope, any security issues in the Bitbucket Cloud applications. The assessment team combined automated application vulnerability scanning, code review, and manual penetration testing techniques in order to rapidly locate attack vectors and simulate real-world exploitation.

Atlassian has been provided the detailed findings and recommendations resulting from the assessment in an assessment report.

Sincerely,

Michael Ostrowski  
Regional Director
