

Production Jumpstart

Get hands-on with Jira Align. Experience enterprise agility at startup speed.

Atlassian Jira Align is designed to provide the visibility, alignment, and productivity that organizations need to succeed with Scaled Agile. The Jira Align Production Jumpstart service helps you demonstrate the value of Jira Align with your data and teams. In close collaboration with a Jira Align Solution Architect, your teams will experience first-hand what it means to achieve better collaboration and faster results through Scaled Agile practices and Jira Align.

- Get teams aligned across the enterprise

 Quickly find consensus on roadmaps, scope, and dependencies across teams and portfolios.
- Orive outcomes at scale
 Unlock the potential of Scaled Agile and demonstrate results to stakeholders.
- Realize value with real data

 Experience Jira Align with your organization's data.
- Make work and purpose visible

 Leverage roll-up technology to keep teams aligned across the enterprise in real time.

How we work together

Your Jira Align Solution Architect will be with you every step of the way. They'll use their expertise to configure Jira Align to your organization's scaled agile practice. At the same time, you'll have weekly check-ins, dedicated workshops, and other purpose-built activities to keep you on track throughout the 3-month program.

KEY ACTIVITY

WHAT WE DO

-	
α	
U	J

Discovery and planning

Face-to-face discussions to align on the program goals, define roles and responsibilities, identify participating programs and associated teams, plan schedules, and define platform terminology, and discover other configurations necessary to implement the platform.

Jira integration

Connect Jira Software to Jira Align with security and gateway stakeholders.

Jira mapping and optimization for scale

Map everything you need to drive scale between Jira Software and Jira Align including teams, tasks, stories, epics, users, status, and more. Jointly review your current Jira environment, identify best practices for scale, and educate users on how to optimize execution for full transparency and alignment across the organization.

Capture backlog

Create themes and epics. Parent features to epics. Use the Jira Align backlog. Adjust object type forms, ensure appropriate fields are visible. Associate any known risks, objectives, or dependencies.

Prioritize backlog

Estimate and prioritize the backlog. Plan capacity and leverage program kanban to manage workflow.

Train pilot end-users

Role based end-user training on the intended workflows and use cases in Jira Align.

Prep for quarterly planning

Load the program increments with epics, features, and stories. Use the Program Room to monitor work in process and plan for the upcoming program increment. Use the Backlog Column View for capacity planning.

Quarterly planning

Platform demonstration of views such as: Roadmap, Program Board, Risks, Objectives, Dependencies, and Program Room.

Scrum of scrums and PO sync

Demonstration of the Program Room and widgets to track progress using the Program Increment Progress Report. Program scrum of scrum meetings, impediments, dependency trends, and team capacity load. Adjust roadmaps. Manage feature backlog.

Ongoing assessment

Guidance for end-users through weekly office hours. Adjust Jira Align configuration as needed, identify operational gaps, and provide additional training as needed.

Review and move forward planning

Workshop to review Jumpstart Program outcomes and plan for next phase of delivery. Documented readout of the session and a plan for next steps.

Are you ready?

The Jira Align Production Jumpstart is right for your organization if you:

- Already use Jira Software as a team tool
- · Follow a scaling framework and such as SAFe, DA, Less, or similar
- Have executed two or more Quarterly Planning events
- Have an established team agile practice for at least six months
- Willing to connect Jira Align and Jira for real world use cases

Enterprise Offerings

The Jira Align Jumpstart Package is part of a family of Atlassian Enterprise solutions:

- Technical Account Managers are experienced solutions advisors from Atlassian—they can unlock the potential of your tools, improve team collaboration throughout your organization, and help you operate and use Atlassian products effectively at scale.
- Premier Support adds responsive access to senior support engineers, global SLAs, and weekend email and phone support coverage.
- Atlassian-certified Solutions Partners add hands-on-the-keyboard consulting services in your environment to architect, deploy, manage, customize and integrate solutions for your specific needs.
- Atlassian University offers the resources you need to develop new skills, improve your team's work, and advance your professional career.
