To Whom It May Concern,

Letter of Assessment

From 19-Apr-2024 to 15-May-2024, pursuant to our agreement with Atlassian Pty Ltd (Atlassian), elttam conducted a review of Bamboo Server and DC.

The assessment was performed by a team of two consultants over the assessment period following a code-assisted penetration testing methodology. The primary objective of the assessment was to evaluate the security posture of the Bamboo Data Center and help steer future security improvements. The engagement concluded with a close-down meeting where findings were discussed with stakeholders. A final report, detailing technical issues and offering remediation advice, was then provided to Atlassian Pty Ltd.

elttam is an independent security company providing research-driven security assessment services to the Fortune 500, global financial institutions, leading technology companies, Australian Federal Government, and up and coming technology start-ups. We combine pragmatism and deep technical insight to help our clients secure their most important assets.

Sincerely,

Matt Jones
Director
